

Factory painted Tectum panels are available in white & Sherwin-Williams custom colors. Painted white Tectum panels are factory painted Sherwin Williams SW7005 Pure White. Custom colors may be selected from the Sherwin-Williams comprehensive color collection.

Tectum Inc. has an exclusive agreement with The Sherwin-Williams Company. Through extensive research and testing, Sherwin-Williams has developed a scuff-resistant paint base that is used to formulate every custom color paint for Tectum Inc. This paint base is exclusive to Tectum Inc. and not available through nationwide Sherwin Williams stores. Due to the unique benefits of this exclusive paint base, Tectum Inc. is unable to match paint colors from other paint manufacturers. For a custom color, please select a six-digit Sherwin-Williams color only.

The procedure for ordering a custom color is as follows:

1. Select Sherwin-Williams color and identify the six-digit code for this color. (The format for this color will be SW ____).
2. Contact the Tectum Inc. Marketing Department to order custom color samples and provide the six digit color code.
3. Tectum Inc. will hand spray paint samples for architectural approval.
4. Once the color sample has been approved, use the same Sherwin-Williams six-digit code when placing the material order.

If a color sample is NOT approved, contact Tectum Inc. with a new color to re-start the approval process.
