

Leading Companies Choose Tectum Products

Fortune 500 companies, leading restaurants and tech companies all choose Tectum products for their spaces.

Why? There are many reasons!

It could be for the look.

With options including printed panels, fabric wrapped panels, shaped panels and paint colors from the complete Sherwin-Williams palette, the design options are almost limitless.

It could be for the environment.

Many Fortune 500 companies have a very clear preference for environmentally-responsible products. Tectum Products can contribute significantly to the environmental credentials of a project.

It could be for the abuse resistance.

In high traffic areas, high-image companies frequently work to avoid the hassle, expense and general disruption caused by broken panels. Even if other panels are easy and inexpensive to replace, when image is important, how long can you afford to have that broken panel in your reception area?

It's absolutely for the Acoustics!

With NRCs of up to 1.00, the affect in any space is a better working (or playing) environment.

Architects and designers have pointed to the reasons above and many, many more when asked, "Why Tectum?" It should be no surprise. After more than 65 years, Tectum Products are an important part of a high-end designer's tool kit.

Leading Companies Choose Tectum Products

Tectum Inc. is proud to be a part of the physical growth of these Fortune 500 companies. We appreciate the confidence their architects and designers demonstrate when they select Tectum Products for these high-profile buildings..
